“Historic Racing Technology is the new classic and vintage motorsport title from the publishers of Race Tech magazine. It brings a unique perspective to the business of restoring, preparing and maintaining historic competition cars in the 21st century, with in-depth technical articles on the engineering and craftsmanship behind this fast growing industry.

Where Historic Racing Technology differs from existing titles is a clear focus on the challenges and opportunities of running these cars in the modern era. From laser scanning through to five-axis CNC machining, historic racing specialists are increasingly blending modern methods and traditional techniques. As a result, it's now possible to produce authentic parts with an unprecedented level of accuracy. In some cases this goes a step further, re-engineering aspects of the car to deliver improved safety or reliability ... and sometimes performance.

Featuring technical articles from some of the industry's most experienced journalists and engineers, Historic Racing Technology is dedicated to the classic motorsport scene across the globe. It takes a fresh new approach, looking at the future of historic motorsport as well as the past.”
