

Race Committee Report

The last Race Committee meeting took place on 15th July.

As normal the topics were Race related, however a number of specific topics drift into general discussions that can do have an effect on the Sport.

These on this occasion related to the Future of the Sport, Medicals, and discussion on attracting new younger officials to the Sport, in depth studying of the recent Race Survey and responses, in conjunction with the good works of Jess Flack of Go Motorsport.

One important discussion took place regarding Drones, a consideration for us all. Electric Cars and Safety Equipment also merited discussion .

In addition to all the above and many other Race issues, we were presented with the Minutes from the recent Historic Committee, a good read and interesting to note similarities between them and ourselves.

There will be one further meeting this year in November.

I shall be with you on the 15th and happy to receive and answer questions

Sandy Denham
